

Pulley System with Gordon Lift Skylotec

Product information

The Gordon Lift System is a pulley system that allows lifting loads up to 300 kg.

The device is self-locking in one direction, which prevents falling loads even when the user releases the rope.

This high-quality device is available with 2, 3 and 4 gears (1 to 2 pulleys) and different rope lengths with a diameter of 11mm. In addition, two carabiners and the DRYBAG are provided to easily store the components of the Gordon Lift System.

Material: Aluminum, Steel

Temperature range: -35°C up to 45°C

Warning: This is only a pulley system, not a personal protective equipment (PPE).
